

Bring in the light

Private client, Amsterdam

'Large oak panels, white plastered walls, black and dark blue furniture'

This former rental apartment has scarce daylight and a lot of small rooms. We transformed it into a fresh and spacious loft with an abundance of natural light.

'the wall cabinet organizes the living, kitchen and dining area'

We designed one bespoke piece to integrate several functions on the first floor: the wall cabinet organizes the living, kitchen and dining area. It also functions as storage space, television cabinet and made-to-measure kitchen. When not in use, oak panels hide this part of the kitchen. The black kitchen island and large table contrast well with the oak and divide the space.
